FUND DRIVE 2012/2013

Dear Friend,

365 days a year, your neighbors, the members of the Palmyra-Cinnaminson-Riverton Emergency Medical Services provide you with the highest quality pre-hospital care in your time of need. However, once a year we need to ask you for financial support. All Contributions and Donations from our fund drive will be used to fund the 2012 budget. Until the year 2000, we remained an all-volunteer service. Times have changed and it became necessary to hire part-time Emergency Medical Technicians (EMT's) to help cover all shifts and ensure prompt service. We provide Emergency Medical Services to residents of the Tri-Boro communities 24 Hours a Day, 7 Days a Week with a combination of Part-time Paid and Volunteer Staff. Unfortunately, hiring a Part-time Paid Staff, along with the rising cost of fuel, daily expenses, and equipment caused us to exceed our normal operating budget. This necessary expense enables us to serve you better, but now we need your financial assistance more than ever. We hope you can be as generous as you have in the past.

DID YOU KNOW?

- Palmyra-Cinnaminson-Riverton Emergency Medical Services (PCR/EMS) provides the highest quality pre-hospital care to the residents of the Tri-Boro area 24 hours a day.
- PCR/EMS responded to approximately 2500 calls in 2011.
- PCR/EMS organizes American Red Cross blood drives at our station on a quarterly basis.
- PCR/EMS maintains a limited inventory of wheelchairs, crutches, and walkers for the residents of the communities we serve. Loan of this equipment can be arranged by contacting our station.
- PCR/EMS is always looking for volunteers. Not only do we need EMT's, but we also need volunteers to assist us in helping in other ways such as building maintenance, legal services and office work. Please check the appropriate box on the return card for more information.
- PCR/EMS needs your tax-deductible donations to continue to provide the 24 hours a day service you have come to expect.
- PCR/EMS is the oldest First Aid Squad in the Nation! We were established in 1921.

Please help us help you by sending your tax-deductible donation today.

EMS

CPR techniques include 3 basic rescue skills, the ABC's of CPR: **A**irway, **B**reathing & **C**irculation. (If at all possible early access to your EMS system should be done. In most areas you would dial 911.)

is the quickest way to get oxygen into the victim's lungs. It should be performed until victim can breathe on own.

1. **Airway** - A key action for successful resuscitation is immediate opening of the airway. The back of the tongue & the epiglottis are the most common causes of airway obstruction in the unconscious victim.

2. **Breathing** - If breathing STOPS, cardiac arrest quickly follows, then mouth-to-mouth rescue breathing

3. **Circulation** - Chest compressions can maintain some blood flow to the lungs, brain, coronary arteries, & other major organs. When chest compressions are performed, rescue breathing should also be performed.

(Important Note: This is NOT a guide to "complete" CPR techniques. Proper training is important. LEARN this LIFE SAVING SKILL...today!)

Palmyra-Cinnaminson-Riverton Emergency Medical Services Officers and Members

Line Officers

Chief – Doug Wickizer
Deputy Chief – Kimberly Brown
Captain – John Quigg Jr
Lieutenant – Bryan Gunn
