Municipality Coverage
New Jersey
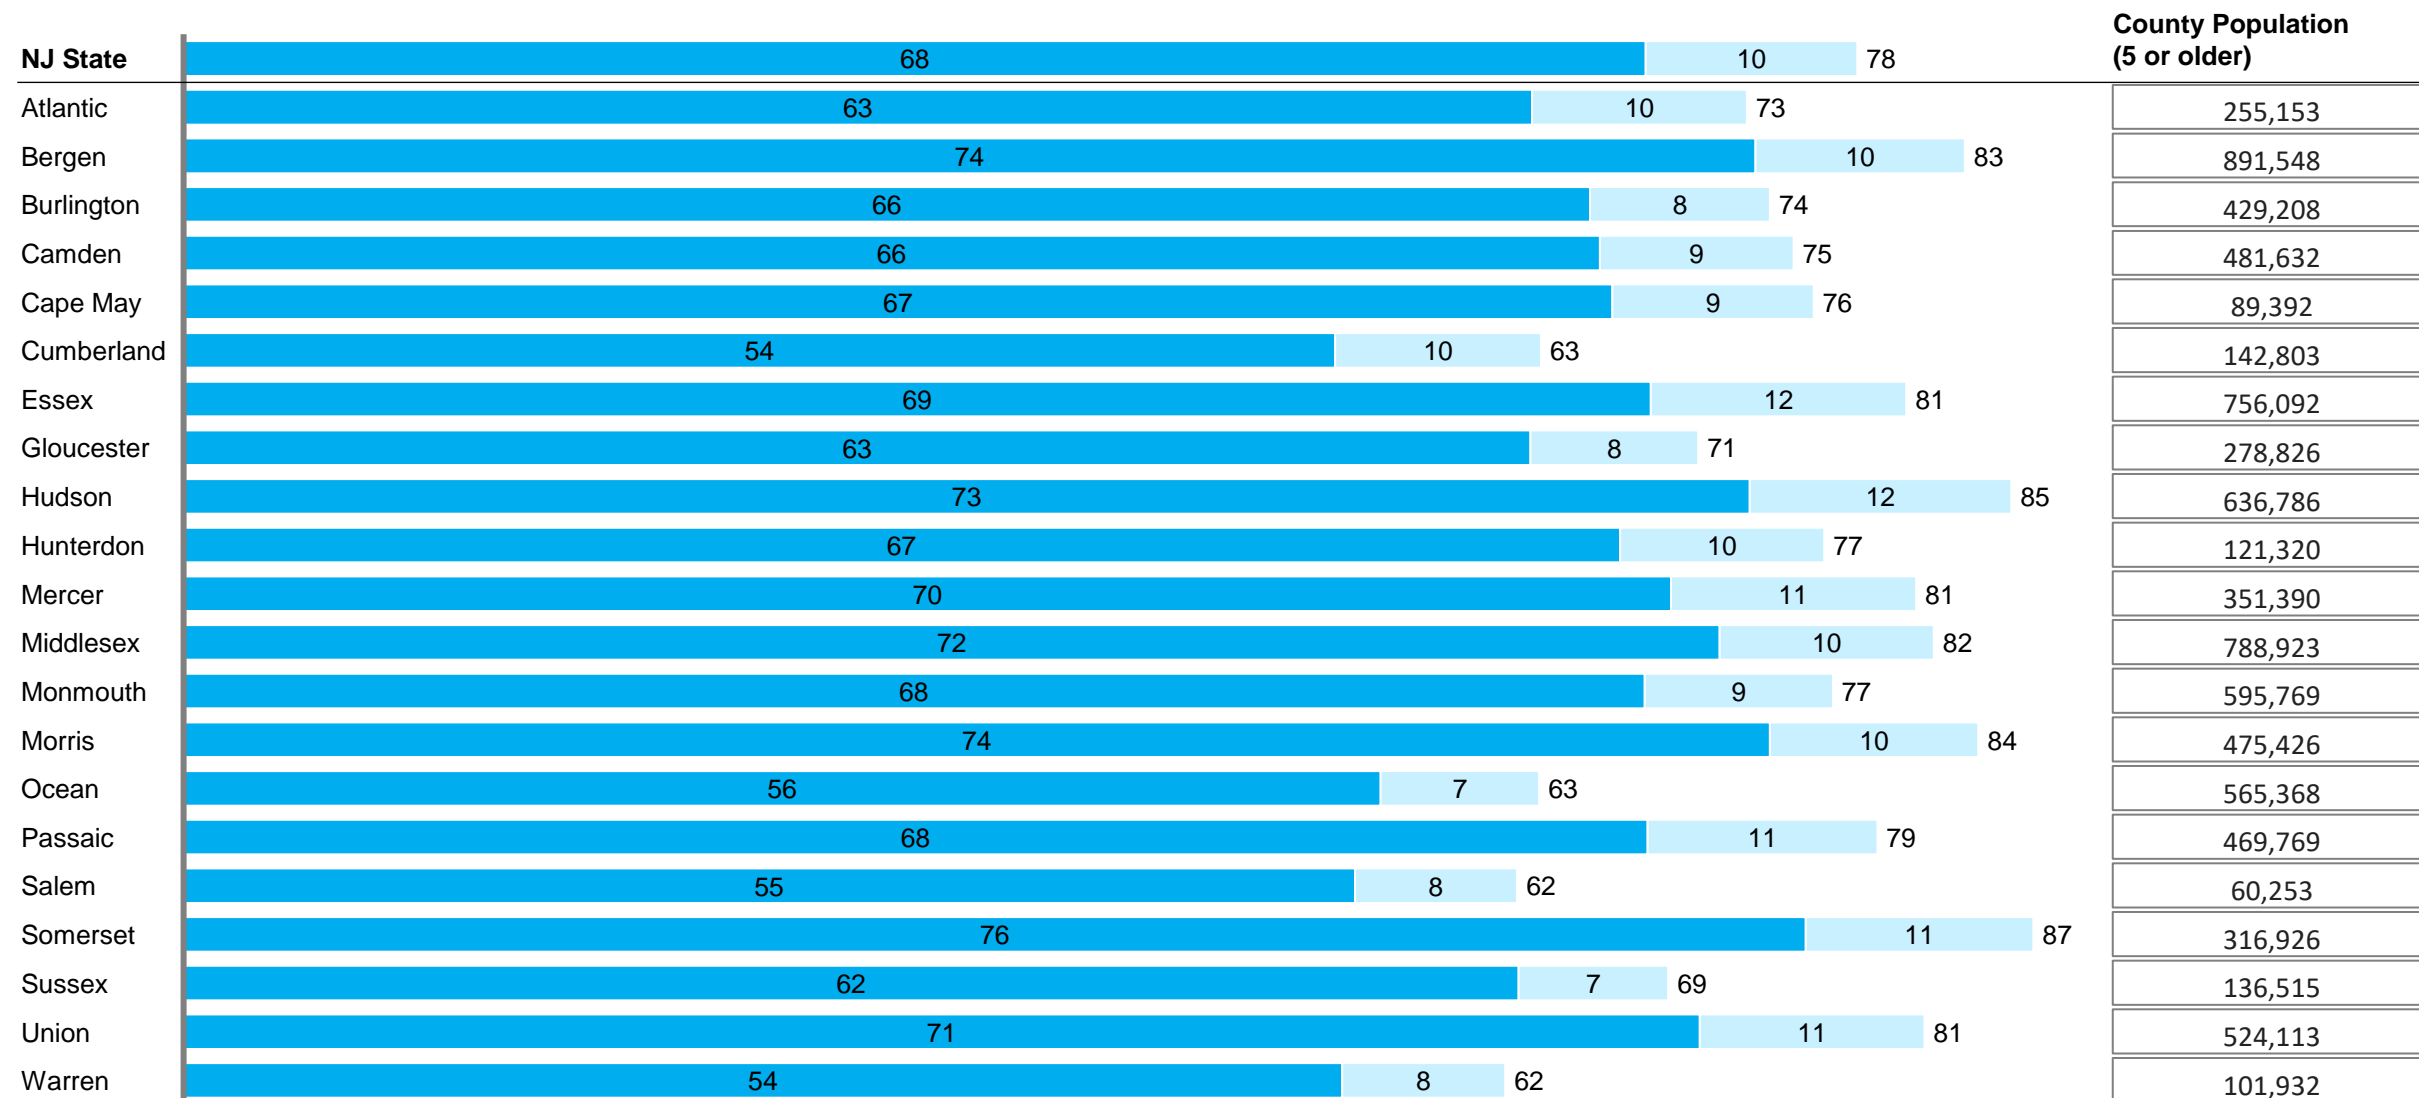

Week of November 30th, 2021

Overview and Statistics

- In the following pages are the municipalities in each county with statistics to include:
  - Population size for 5 years and older in each county/municipality
  - Population size for 12 years and older in each county/municipality
  - Population size for 18 years and older in each county/municipality
  - Population size for 65 years and older in each county/municipality
  - Population size for 80 years and older in each county/municipality
  - Share of residents with a vaccine course initiated (percentage share) from NJIIS
  - Share of residents with a vaccine course completed i.e. fully vaccinated (percentage share) from NJIIS

- Please note that the population bands are defined as the following:
  - 5+ population is defined as total residents that are 5 years old and older
  - 12+ population is defined as total residents that are 12 years old and older
  - 18+ population is defined as total residents that are 18 years old and older
  - 65+ population is defined as total residents that are 65 years old and older
  - 80+ population is defined as total residents that are 80 years old and older

- Share of residents with a vaccine course initiated is calculated using the number of residents (5+, 12+, 18+, 65+ or 80+) that have received only the first dose in a two dose vaccine divided by the total residents (5+, 12+, 18+, 65+ or 80+)

- Share of residents with a vaccine course completed is calculated using the number of residents (5+, 12+, 18+, 65+ or 80+) that are fully vaccinated i.e. have received two doses for two dose vaccines or 1 dose for 1 dose vaccines divided by the total residents (5+, 12+, 18+, 65+ or 80+)

- The data in the graphs showing the municipalities have been sorted first by county and then alphabetical by municipality name. Each bar graph adds the share of residents with a vaccine course initiated and the share of residents with a vaccine course completed to show the share of residents that have received at least one vaccine shot.

- Please note that this data does not include any New Jersey residents that have been vaccinated out-of-state or by federal programs or are currently reported as unknown (pending geocoding)

5+ Municipality coverage report
