

Wastewater Sewer Information

Residents are responsible for maintenance of sewer lines from the house to the main (in the street). Call the Sewer Department first if you are unsure of the source of the problem, and an employee will investigate and determine if you are responsible for its repair. Cooking fat, paint, solvents, chemicals and pesticides should NEVER be poured down the drain. If you are unsure about how to dispose of something, please call the Sewer Department at 829-1476 before you pour.

You can also obtain information about the New Jersey American Water Company (NJAWC) by visiting their website at [New Jersey Homepage \(amwater.com\)](http://www.amwater.com)
